

The merger of two worlds Bitcoin and Ethereum.

Purchase process for AGAVE BIT and AGAVETHER token cryptocurrencies.

Websites:

CRYPTOCURRENCY AGAVE: www.agaveagave.com

DECENTRALIZED SYSTEM: www.AgaveCity.com

Abstract. The first digital token dual backed by two cutting-edge technologies are blockchain oriented to the agave sector. A currency provides individuals and organizations with a robust and decentralized method of exchanging value while using a familiar accounting unit. The innovation of blockchains is an auditable and cryptographically secured global ledger. Asset-backed token issuers and other market participants can take advantage of blockchain technology, along with embedded consensus systems, to transact in familiar, less volatile currencies and assets. In order to maintain accountability and to ensure stability in exchange price, we propose a method to maintain a one-to-one reserve ratio between a Hibrid cryptocurrency, called AGAVE. This cryptocurrency is obtained from two Crypto tokens identified as AGAVEBIT and AGAVETHER, and its associated real-world asset, with value agave currency. This method uses the Bitcoin-NG blockchain (AGAVE) and Blockchain Ethereum (AGAVETHER), both are proofs of reserves, and other audit methods to prove that issued tokens are fully backed and reserved at all times in both blockchains.

Process of use, purchase, sale, exchange of AgaveSP (Services & Products) with Cryptocurrencies AGAVEBIT and AGAVETHER within AgaveCity.

At AgaveCity you can invest, exchange, buy or sell products and services based on the agave industry, from owning a land where the agave is grown to creating new products. Any company or physical person wishing to register and choose the place where they can promote, buy or sell their services or products can do so without registration cost, in AgaveCity one can move easily through the course in the virtual city, the person who registers to offer their services or products can choose the segment where their product or service is best described, later the users (clients) will be able to enter AgaveCity to choose and find easily by segment SP (Services and Products) with just one click. In Agave City, you will be controlled by a decentralized virtual banking system called AgaveBank with its own virtual Currency Changer and with its official Cryptocurrencies token AGAVETHER and AGAVEBIT. In 2019 there will be a coin called AGAVE where the previous ones merged taking advantage of the characteristics of each one.

The user chooses the segment of services or product with a single click...

In AgaveCity in the near future will have the cryptocurrency called AGAVE (mix between AGAVEBIT and AGAVETHER) this will be the main currency to make purchases and sales of services, products and agave lands, will be mainly valued based on the price per kilogram (unit) of agave the product that gives basis to AgaveCity this will be the service AgavEstate with a Cryptocurrency will be worth the following minimum ratio:

Initial Price:

$$1 \text{ CRYPTOCURRENCY AGAVE} = (1 \text{ AGAVE KILOGRAM} + 1 \text{ USD}) \times (1 + \text{LTSGR}/100)$$

This price relationship will remain regardless of the long-term supply growth rate LTSGR (percentage)

In agaveCity with AgavePeople you will have a real time communication with the most influential people in the agave sector, manufacturers, entrepreneurs, visionaries, producers, new businesses, new products. Create a network of relationships that will impel you to succeed or grow with your project, product or services that you offer.

The user chooses the segment of services or product with a single click...

In AgaveCity there will be a product storage system for stock control and control of shipments of products or services related to agave.

The user chooses the segment of services or product with a single click....

The user through AgaveCity (Virtual City) can contract the distributor, manufacturer, product or services which can be acquired through the two official cryptomodenas (AGAVETHER AND AGAVEBIT), also have the option of buying and selling in USD and EUROS. Everything can be easily exchanged in buying and selling currencies in AgaveBank in the future.

The service and product provider will be able to negotiate with the crypto-currencies or, if necessary, exchange them for USD or EUROS to deposit in their normal bank account that they use.

The user chooses the segment of services or product with a single click...

In agaveCity we will support you so that your products and services can touch the farthest place in the world with AgaveNews, AgaveCommunications, AgavExchange and more.

The user chooses the segment of services or product with a single click...

....and more AgaveSP (Services and Products) inside AgaveCity.

In the year 2020 we have the initiative of the Agave Foundation, Foundation with funds to help with the feeding, education and supplies of the international child population and funds for natural disasters of agave fields, support to producers and crowdsale projects.

Flow of Funds Process with cryptocurrency token AGAVEBIT

There are six steps in the lifecycle of an AGAVEBIT, best understood via a diagram

*Cryptocurrency Token AGAVEBIT (Based in Bitcoin-NG)

Step 1 – Create account into Wallet Waves Platform DEX into <https://waveswallet.io>

Step 2 - User funds his new account with Bitcoin or Ethereum in Exchange Waves DEX Lite Client Account (new address).

Step 3.- you can now buy AGAVE with your funds that you have deposited, in a simple way, you choose the option of Wave Decentralized Exchange in the second field to put the identifier of the cryptocurrency token of AGAVE the currency will appear and it will move for the first field, later in the second field chooses with which you will buy the AGAVE (type Bitcoin or Ethereum)

Choose the option DEX (Waves Decentralized Exchange)

Waves Decentralized Exchange
Access to Waves markets where you can conveniently buy, sell and trade tokens.

Candles cover 30 minute intervals
Last updated: 23:12:59

Identifier AGAVEBIT in the second field (it's not to address).

Identifier AGAVEBIT:

Step 4 - AGAVEBIT generates and credits the user's Waves account. AGAVEBIT enter circulation.

Step 5- Users transact with AGAVEBIT. The user can transfer, exchange, and store AGAVE via a p2p 8 open-source, pseudo-anonymous, Bitcoin-based platform.

Step 6 -The user deposits AGAVEBIT with Waves Platform for redemption into fiat currency. Cryptocurrency Token AGAVE can be used in AgaveCity

Users can obtain AGAVEBIT outside of the aforementioned process via an exchange or another individual. Once an AGAVEBIT enters circulation it can be traded freely between any business or individual.

For example, users can purchase AGAVEBIT from Waves Exchange DEX, with more exchanges to follow soon.

Flow of Funds Process with cryptocurrency token AGAVETHER

There are five steps in the lifecycle of an AGAVE or an AGAVETHER, best understood via a diagram

*Cryptocurrency Token AGAVETHER (Based in Ethereum)

Step 1 – Create new account or Export your account into EtherDelta DEX in <https://etherdelta.com>

The screenshot shows the EtherDelta homepage. At the top right, there is a dropdown menu with options: '0 ETH' (highlighted in orange), 'EtherDelta (Private Key)' (highlighted in orange), 'ETH' (highlighted in green), and 'MetaMask' (highlighted in green). A red circle and a dashed arrow point to the 'MetaMask' option. Below the menu, a modal window titled 'Choose New Account or Import your account.' is displayed. The modal contains several options: 'New account' (highlighted in red), 'Import account', 'Ledger Nano S', 'Etherscan address', 'Export private key', 'Forget account', and 'Gas price'. The background of the page shows the 'BALANCE' section with PPT and ETH amounts, the 'ORDER BOOK', a 'PRICE CHART' for PPT, and a 'MY TRANSACTIONS' section.

UPDATES

EtherDelta (@EtherDelta) The EtherDelta platform is back online and

Congratulations!!! You are already part of the Agave community.

Step 5 - Users transact with AGAVETHER . The user can transfer, exchange, and store AGAVETHER via a p2p & open-source, pseudo anonymous, AGAVETHER platform with EtherDelta.com.

Step 6 -The user deposits AGAVETHER with etherDelta.com for redemption into fiat currency. Cryptocurrency Token AGAVETHER can be used in AgaveCity

Users can obtain AGAVETHER outside of the aforementioned process via an exchange or another individual. Once a AGAVETHER enters circulation it can be traded freely between any business or individual.

For example, users can purchase AGAVETHER from etherDelta.com , with more exchanges to follow soon.

The main concept is that the number of token cryptocurrencies that have been generated with the property of "Not Reissuable" is limited. For investor security.

NOTE: Both cryptocurrencies Token: AGAVEBIT and AGAVETHER will always have the same value, no matter the normal fluctuation of the market either high or low.

Derivatives and units of measure of Cryptocurrency AGAVE.

The AGAVE network includes its own built-in currency, ether, which serves the dual purpose of providing a primary liquidity layer to allow for efficient exchange between various types of digital assets and, more importantly, of providing a mechanism for paying transaction fees. For convenience and to avoid future argument (see the current mBTC/uBTC/satoshi debate in Bitcoin), the denominations will be pre-labelled:

1 AGAVETHER = 1 AGAVEBIT = 1 AGAVE (LAUNCH 2019)

In the Future units AGAVE (2019)

1 AGAVE = 1000 TEQUILAS = 1000000 MEZCALES = 1000000000 PULQUES

Currently there is a Cryptocurrencies Token emission with the following characteristics:

Release date for sale: April 12, 2018

Name of exchange coin: EtherDelta (<https://etherdelta.com/>)

Name: AGAVETHER

Platform-based: Ethereum Foundation
